

Electrical Supplies. Powerful Service.

Easy and affordable lamp, ballast and battery recycling is here.

Prepaid recycling packs: Safely store, ship and dispose fluorescent lamps, ballasts and batteries

Gexpro's prepaid recycling packs make recycling easy, safe and cost-effective.

Easy & Safe Storage

Simply place empty recycling packs in your store room. Every time a lamp,

ballast or battery is replaced, put it in the pack. Now lamps don't break or endanger employees while waiting to be shipped to recycling. And everyone knows where to place ballasts and batteries for proper disposal. Packs are pre-configured for convenient use and include:

- four-foot lamp boxes
- eight-foot lamp box
- miscellaneous CFL and odd-size lamp box
- ballast pail
- battery pail

Prepaid, Pre-addressed Shipping

When the pack is full, simply seal it up and send it to the recycling center. It comes with pre-addressed labels and prepaid shipping. Once you purchase a pack, there are no other costs.

Certified Disposal and Tracking

Don't worry about compliance, because it's all taken care of. The packs include online shipping and recycling tracking. And, more importantly, you receive disposal certification as required by the Federal Resource Conservation Recovery Act (RCRA) and the California Department of Toxic Substances (DTSC). You're in the clear and your retired lamps, ballasts and batteries aren't in the landfill.

We've made recycling your lamps as easy as turning on the lights

The fluorescent lamps that help save the environment no longer need to harm it. Order your prepaid recycling packs today.

Choose The Pack That's Best For You
